

Anywhere.
Everywhere.
Fresh Air...
To Go!

From your:

- Car
- Boat
- RV
- Camper
- Semi Tractor

To your:

- Office
- Hotel Room
- Kitchen
- Closet
- Laundry Room

Anywhere you go
and everywhere you
need it, fresh air is
as convenient as the
press of a button.

More than just an air freshener...

Yes, it will freshen the air in your car, but it does so much more. With a *Fresh Air To Go* you are taking with you our powerful SynAirGtechnology, which incorporates the same process NASA uses to scrub the air inside their spacecraft. Whether you're sitting in the driver's seat or reclining in an office chair, Fresh Air To Go is hard at work combining UV light and rare metals in a process known as Radiant Catalytic Ionization (RCI). Together with ionization and activated oxygen, this unique synergy creates the highly effective "supercharged" SynAirG process available only in EcoQuest products. And that's just the start! SynAirG does most of its work after it reaches the air outside the unit, eliminating smoke and odors. Contact your EcoQuest Dealer today and find out for yourself what it's like to take fresh air with you.

EcoQuest™, Fresh Air To Go™, Healthy Living Technologies™, RCI Radiant Catalytic Ionizer™, SynairG™, are Trademarked by EcoQuest™ International.
EcoQuest International "Healthy Living Technologies"®, Fresh Air by EcoQuest Logo, are Registered by EcoQuest™ International.

At EcoQuest International we take our mission seriously

both in the Opportunity we provide and in the products and services we offer.

Today, American families spend more than 90% of their time inside. The dust in the carpet is the equivalent of toxic waste. The water at the kitchen sink, which we thought was safe, is polluted with contaminants that are putting our health at risk.

Experts say that between 2 and 10 million dust mites live in your mattress, and another 2 million live in your pillow.

At EcoQuest, issues like these are important to us because they are important to you and your family.

We are driven by our purpose: To enhance and improve the quality of living indoors by providing products which bring safety, convenience, and beauty into the spaces where people spend their lives and to provide real life-changing Opportunity.

Anywhere.
Everywhere.
Fresh Air...
To Go!

Take your fresh air with you.

Small enough to fit in your pocket, convenient enough to take with you everywhere.

The new *Fresh Air To Go* takes our proprietary SynAirG technology and puts it in the palm of your hand, ready to go on your morning commute or your next vacation. From the car to the office in just a few seconds, *Fresh Air To Go* stays with you, eliminating smoke, odors, and other air contaminants in the areas where you spend your time.

Of course, you need fresh air in more places than just the car or office. You can use the new *Fresh Air To Go* in a boat, RV, semi-tractor... wherever you have a power outlet. Hang it in the closet to freshen clothing. Place one in the bathroom or near a laundry hamper. Use it in the kitchen after cooking. Whether you hang it from the wire stand or mount an extra base on the wall, fresh, clean-smelling air is available anywhere you need it, with *Fresh Air To Go*.

One of the unique features of the *Fresh Air To Go* is the wire stand and mounting base combination. Designed to make the *Fresh Air To Go* as versatile as possible, the wire stand can be used

with or without the base for everything from sitting on a desk to hanging over the edge of a laundry basket (or in a pocket on the back of a car seat). The quick release base can be placed on your dash using Velcro, attached to the windshield with suction cups, used as a stand on a table top, or mounted to a wall for convenience. Just snap the wire stand in, and you're set. However you choose to use your *Fresh Air To Go*, we're confident you'll find it both convenient and effective.

Fresh Air TO GO™

Adjustable Wire Stand and Base

Quick Release for easily removing unit from base

12VDC Car Adapter

Universal AC Adapter power supply with interchangeable plugs

Suction Cups & Velcro for mounting

LED Indicators for Fan Speed and Purification Levels

Optional Fresh Air To Go Accessory Case (sold separately, item# US90060)

SPECIFICATIONS

- 12VDC or 110 - 240 VAC 50/60Hz
- 10 watts maximum power usage
- Fixed 6 KV DC needle ion generator
- 3 speed fan
- Size: 4" x 6" x 1.25" (w/o base)
- Weight: < 8 ounces
- One (1) year limited warranty

LEDs Setting Coverage

- ● ☀ Low: compact car, pick up
- ● ☀ M.Low: mid to full size car, RV, etc.
- ☀ ☀ Med: Large RV, unoccupied vehicle, hotel room (500 ft²)
- ☀ ☀ ☀ M.High: Large hotel room or office (750 ft²)
- ☀ ☀ ☀ ☀ High: 2-room suite or large kitchen (1250 ft²)
- ● ● OFF: Purifier off, ionization & fan continue operating

5. The SynAirG Process continues working out in the environment to eliminate smoke, odors, and other air contaminants

4. Ions are introduced into the SynAirG stream just before exiting the unit

1. Specially engineered Purification Plate begins the SynAirG™ Process

3. Rare metals on the RCI Target combine with UV light in a process known as Radiant Catalytic Ionization (RCI), producing a unique mix of hydroxyls and hydroperoxides, "supercharging" the SynAirG process

2. UVX light activates the Photocatalytic RCI Target
